

Open Access

Can I make a book chapter open access?

You can add book chapters to RIS (and make them open access via Cronfa) provided your publisher allows this. At the moment there is no central source for information on book publishers so you would have to approach them directly. Book chapters are not included in the open access requirements for the next REF but the university is encouraging all work to be made open access where possible. Visit our [Open Access Guide](#) for further information.

Unique solution ID: #1297
